Vaccine Protocol for Purchased Show Pigs
February 2015

Fostera PRRS one dose

Fostera PCV HM two doses. Booster given 2 to 3 weeks after initial dose.

Flusure XP two doses. Booster given 2 to 3 weeks after initial dose.

Dectomax on arrival and once monthly to control mange and intestinal parasites.

Fostera PRRS vaccine only comes in a 50 dose bottle and is only good for a few hours after it is mixed. Will not be effective if used after this.

Flusure XP only comes in a 50 dose bottle and must be mixed. It is good for 30 days in the refrigerator once mixed.

Foster PCV HM only comes in a 50 dose bottle and is good until the entire bottle is used as long as it is refrigerated.
